DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 9, 16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gorton.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7, 9, 11-12, 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gagnon et al. in view of Town et al.

Town shows a tapered handle that is wider at the back than at the connection to the fork. This is a relatively standard design that has the advantage of enabling the user to better manipulate the utensil. Obviously one of ordinary skill in the art would have such knowledge and employ it to modify the device of Gagnon by widening the rear of the handle. Town also teaches that seriated edges have an added advantage. Such edges would obviously be added to the Gagnon as and for the purpose of Town. The material

used for the fork would, absent a showing of criticality, be an obvious matter of choice for one of ordinary skill in the art.

Claims 10, 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gagnon et al. and Town et al. as applied to claim 1 above, and further in view of Cox. Cox shows that the outsides of a fork may be sharpened to add a function to the implement. Obviously one of ordinary skill in the art would add such degrees to the fork of Gagnon to add a function.

Claims 13-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gagnon et al. and Town et al. as applied to claim 1 above, and further in view of Bouchakian.

Bouchakian shows a fork with one sharp edge and a dull edge. This is a way of adding a function to the fork. Obviously, one of ordinary skill in the would add such an edge to the fork of Gagnon to add a function thereto.

Allowable Subject Matter

Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
